

This is a message from The Xova Movement. We are a new activist initiative that has been 10 years in the making, and this flyer is being spread to people around the world as part of our first announcement. Our mission is to create an ideal world and future for everyone, and as rapidly as possible. Our primary plan for achieving this is to transition countries to democratic socialism, which among other things would include abolishing the ruling class, introducing a Universal Basic Income, generously funding public infrastructures and services, transitioning societies to a 4 day workweek, guaranteeing fair wages for all workers, making businesses optimally democratic, preventing all future economic downturns, permanently ending inflation, and decommodifying all goods and services, including abolishing rent and mortgage interest payments. Our first approach for implementing this is to educate populations about democratic socialism. Our second approach is to introduce 12 essential election reforms, and to hold elections for every electable position in November, in as many countries as possible.

If you want to experience this substantially higher quality of life, please do everything you can to support our movement. One of the best things you can do is simply spread awareness of our movement. If you want detailed advice on how to support our movement please visit our website or read Chapter 3: Part 4 (p. 585) of our manifesto. If you are willing to read our manifesto then this would be ideal, since not only does it contain essential information that must become common knowledge in the immediate future, but also because it is guaranteed to be misrepresented by others, and particularly right-wing propagandists. If you lack the time, please at least read the "Foreword", the "Introduction", and any parts that you feel would be personally relevant. All documents are available at [TheXovaMovement.com](http://TheXovaMovement.com) and the Xova wiki.

Our plan is to release our next major announcement in June. This will reveal our most important initiatives, which will include public protests around the world which will begin soon after our next major announcement, and which we hope will be attended by millions of people. Many of these initiatives will also include financial rewards for those who complete certain objectives.

If you are someone who protects the ruling class and their interests, such as by working for intelligence agencies, law enforcement, the military, private security agencies, or the legal system, please understand that you and our movement are on the same side. You may be directed to suppress our movement, but recognize that our movement's success will substantially benefit you, your loved ones, and everyone else in the world. We are not asking you to break any laws, but please keep all of this in mind.
